NAME :- Haseeb ROLL NUM :- 045

QN: 01)

Path	Node	G1(N)	H(N)	F(N)
S-A	A	4	1	4+1=5
S-B	B	6	2	6+2=8
S-C	C	2	3	2+3=5

We select node C.

NODE: C :=

NODE C is connected to node (G1) :=

path	node	g	h	f
S-C	C	0	3	3
C-G1	G1	2	3	5

Now Comparison:-

S-A-G1 = 4+1 = 5

S-A-B-G1 = 4+6+5 = 15

S-C-G1 = 2+3 = 5

Final path:-

$S \longrightarrow C \longrightarrow G$

Conclusion:- The shortest path is $S \rightarrow C \rightarrow G$ have shost distance of destination.
